

On-demand software, often referred to as Cloud or Software as a Service (SaaS), is rapidly gaining favor with decision-makers across all applications and verticals. Lower ownership costs, rapid time-to-benefit, easier scalability and other substantial advantages make the Cloud model highly attractive to organizations under pressure to do more with less.

QUMAS Cloud is a model of software deployment whereby QUMAS licenses the QUMAS Compliance Platform to customers for use as a service, generally over the internet.

Benefits

- **Scalable**
 - Infrastructure / operational resources are bundled and managed for a lower total cost of ownership
 - Complete infrastructure immediately available and instantly scalable (QUMAS provides solutions for 20 to 120,000 users)
- **Accessible**
 - Ease of distribution (web browser access)
 - Simple software upgrades performed with minimal or no downtime
- **Available**
 - Platform is always on
 - Configuration instead of customization
- **Qualified Environment**
 - Leverage a proven, qualified and validated environment from a trusted compliance partner
 - Get up and running with a secure solution in a short time frame

Let's take a detailed look at the QUMAS Cloud:

QUMAS Cloud	
Cost	Management + Users
Tenant	Multi-Tenant application servers
Redundancy	Redundant Server Farms (multiple web servers – if one fails, the other continues)
User numbers	User licenses purchased as standard
Upgrades	<ul style="list-style-type: none"> • QUMAS determines timing of upgrades, biannually • Client Upgrades within mandatory period of 2 months • No upgrade charge <i>see Note 1 below</i>
Software Versions	Current version of software only
3rd party applications	Rendering, Reports, auto-population are included in the hosted costs (SAP Business Objects, Adlib)
Qualification	QUMAS performs OQ, Client performs PQ as required with pre-configured PQ scripts from QUMAS
Environments	One environment with two repositories, test and production, test environment can be moved for upgrade validation
QUMAS Packages Solutions	QUMAS Packaged Solutions: <ul style="list-style-type: none"> - QUMAS Quality Assurance Documents Package - QUMAS R&D Submission Documents Package - QUMAS CAPA Process Package - QUMAS Deviation Process Package <ul style="list-style-type: none"> - QUMAS Change Control Process Package - QUMAS Complaint Process Package - QUMAS Audit Process Package - QUMAS CRO Documents Package - QUMAS CMO Documents Package

QUMAS Cloud

OS Patches	QUMAS manages OS Patches
Backups	QUMAS manages backups
Log monitoring	QUMAS manages log monitoring
Support cases	Log with QUMAS Support as standard
Optional Extras	Leverage optional extras as required: <ul style="list-style-type: none">- Service Desk- System Administrators- IT team- Online Training- Technical Remote Assist- Application Remote Assist- Targeted Account Manager and many more.

Note 1: Software available to QUMAS Cloud clients will be released on a scheduled basis (software releases will be reviewed and assessed twice a year). Critical hot fixes may be applied in the interim as decided by QUMAS management.

Experience the Benefits of a Cloud Environment:

- Application leading, no up front capital investment, e.g. Leasing Oracle from QUMAS, not buying => lower cost
- QUMAS takes care of OS, backups, security etc.
- Lower cost because of shared resources
- QUMAS responsible for upgrade path
- QUMAS responsible for OQ certification of the environment
- Built-in multi-server redundancy
- No additional application enhancement costs, all enhancements are covered by the annual rental agreement
